SUMMARY

Results-driven DevOps and Site Reliability Engineer with 3+ years of experience designing, deploying, and managing secure, scalable infrastructure on AWS using Terraform. Skilled in CI/CD automation, container orchestration (Docker, Kubernetes), and observability tooling (Datadog, Sumo Logic, CloudWatch, PagerDuty). Proven track record of zero-downtime production migrations, incident response, and cross-team collaboration to improve system reliability and performance. Passionate about automating infrastructure and continuously improving development and deployment workflows.

PROFESSIONAL SKILLS/ TECHNOLOGIES

- **Public Cloud:** AWS: Architecture & Configuration, Storage, Compute, Backup & Recovery
- **Container Orchestration:** Kubernetes, Docker
- **Security:** Authorization (Groups, ACLs,) Encryption
- **Databases:** PostgreSQL, MySQL, Aurora, Cassandra
- **Languages:** Python (Pandas, Numpy, SMTP, Google Scikit-learn, TensorFlow), Java, Yml
- **Tools:** Terraform, Sumologic, Okta, Pagerduty, Ansible, GitHub, Postman
- **Operating System:** Windows, Linux

MAJOR ACHIEVEMENTS/ CERTIFICATIONS

- | | |
|---|-----------------|
| • AWS Developer- Associate | (November-2025) |
| • AWS Solution Architect - Associate | (April-2023) |
| • AWS Cloud Practitioner | (January-2023) |
| • Microsoft Certified Associate in Python Programming | (May-2021) |

TECHNICAL TRAINING & WORKSHOP

- | | |
|---------------------------|------------------------------|
| • Azure | (Techlift Bootcamp, Contour) |
| • Databases Masterclasses | (Oracle-Live DB) |
| • AI (ML & DL) Classes | (Coursera) |
| • Python | (Python Institute) |
| • Java | (Oracle Java) |

ACADEMICS

- | | |
|-------------------------------------|--|
| • Bachelor's in Computer Sciences | (2016-2020) University of Agriculture Faisalabad, Pakistan |
| • Intermediate in Computer Sciences | (2014-2016) Government College |

WORK EXPERIENCE

Associate DevOps Engineer at Hybytes (Lahore)

January 2023 – January 2024

Hybytes is an AWS Partner providing Cloud Infrastructure Solutions for small to enterprise products.

Projects/Achievements:

- Migrated the application (frontend and backend) from old to new servers.
- Created the backup of PostgreSQL and stored it on drive.

- Migrated the AWS CodeCommit repositories to GitHub.
- Worked on AWS Technologies (EC2, Lambda, EBS, IAM policies, CodePipeline, etc.).
- Gained understanding and experience in Docker, Terraform, Nginx, and code deployment.
- Acquired knowledge about CI/CD pipelines and GitHub Actions.

Software Systems and DevOps Engineer at Xgrid (Lahore)

January 2024 – Present

Xgrid delivers world-class end-to-end solutions focusing on web and mobile development, secure cloud infrastructure, intelligent cloud solutions, and user interface and user experience solutions.

Projects/Achievements:

- Deployed the WordPress application (frontend and backend) on AWS using Terraform.
- Deployed the serverless application on AWS using Terraform.
- Migrate production application cross region without down time.
- **Infrastructure Drift Detection Dashboard:**
 - Built DriftLens, a self-hosted AWS drift detection dashboard using FastAPI, React, and Terraform to detect unmanaged and config-drifted resources in real time
 - Automated IaC remediation by auto-generating Terraform HCL and streaming plan/apply output to the browser via SSE
 - Implemented multi-region Terraform provider aliases with a shared S3 state backend for single-workspace multi-region resource management
 - Integrated GitHub PR automation to commit generated Terraform files and open PRs automatically for full GitOps traceability

Site Reliability Engineer (SRE):

Tools/ Platforms:

- **AWS:** A cloud platform used to deploy, manage, and scale applications and infrastructure securely.
- **Datadog:** Tracks application performance, logs, and infrastructure health in real time.
- **Sumo Logic:** Log management and analytics platform for troubleshooting from system logs.
- **Okta:** Identity and access management platform that enables secure user authentication
- **PagerDuty:** Alerts on-call teams and helps respond to system issues quickly.

Responsibilities:

- Monitor, maintain, and improve the reliability, availability, and performance of production systems and services.
- Perform incident response, troubleshooting, and root-cause analysis for production issues across AWS, Kafka, Cassandra, and other critical platforms.
- Manage on-call SRE shifts, ensuring timely response to alerts and minimizing service disruptions.
- Automate operational tasks to reduce manual effort and improve system consistency.
- Maintain and improve monitoring dashboards, alerting rules, and metrics through tools like Kafka UI, CloudWatch, and other observability platforms.
- Support deployment processes and ensure smooth release cycles while maintaining system stability.
- Collaborate with development teams to implement best practices for scalability, fault tolerance, and performance.
- Ensure proper logging, tracing, and monitoring configurations for all services.
- Manage and maintain infrastructure components in AWS, including EC2, S3, networking, and IAM roles/policies.
- Handle large-scale data operations (e.g., Cassandra queries, DSBulk operations, Kafka consumer groups) ensuring efficiency and reliability.
